PERSONAL PROJECTS

Weather-App

- <https://github.com/PawanDewani4192/React-Weather-App>
- Weather app fetches the current weather from OpenWeather APIs for your city . Developed and Styled UI with styled-components

Zomato-Clone

- <https://github.com/PawanDewani4192/Zomato-Clone>
- I have cloned Zomato using React.js, this project is a perfect example of "Simple and effective", Zomato's website is really smooth and has a great UI/UX.

Student-Management-ERP

- <https://github.com/PawanDewani4192/Student-Management-ERP>
- A Django project of a Coaching/Institute ERP that helps to manage all day-to-day institute activities including administrative tasks, curriculum management, student information, fee record, Batch management, etc.

User Registration using-Django

- <https://github.com/PawanDewani4192/SignUp-Login-Django-Project>
- Created a Login System in Python using Django framework. where user can login and signup into page using Django & postgresql database in which all the data of user will store in the postgresql database when users register themselves. And when users login to website then check that user information is present or not in postgresql database.

Portfolio-Website

- <https://github.com/PawanDewani4192/My-portfolio>
- Personal portfolio website that provides information about me, services that I offer, my projects and my contact details etc.
